Form to Change from Semi-Open to Open Database

All NORMAL results submitted directly to the OFA, or resulting from OFA evaluations, whether by veterinarians or through laboratories, will be placed in the public domain. Results in the public domain are available to anyone through the OFA website or through office inquiries.

Abnormal, At-Risk, Equivocal, and most Carrier results are only available to the public if the owner or agent authorize release of the results.

If Abnormal, At-Risk, Equivocal, or Carrier results are currently in the closed database and you wish to release the results and place them in the public domain, please complete the fields below, sign the form, and submit the form to the OFA via mail, fax (573-875-5073), or email (ofa@offa.org).

Form

I hereby request that the information in the OFA databases for the following dog:

(registered name and breed of animal)

(registration number and/or OFA number)

be included in the open database. I understand that this will allow all the results and the animal's identity to be available to the public.

Owner name: _____

Today's Date: _____

Signature: _____
